Downtown Design

Cristina Romelli Gervasoni is Fair Director for Downtown Design

What is Downtown Design?

Downtown Design is owned and managed by Art Dubai Fairs LLC, the company behind Art Dubai and Design Days Dubai – two of the most successful art and design collectors' fairs in the region. Downtown Design will bring together a selection of international design brands renowned for their quality products and focus on manufacturing craftsmanship. The Fair will be the first design event in the region that is focused on showcasing the best in international design and the newest trends.

Why does Dubai need an event like Downtown Design?

Downtown Design aims to be a major catalyst in the growth of the design industry, and Dubai has enormous potential to become a

global center for design. There is a distinct lack of high-quality design events in the region. Despite there being a natural demand, there is currently no design fair of international standard.

What will it offer visitors?

Held in a unique venue at the foot of Burj Khalifa, the fair will not only showcase design from some of the world's top brands, there will also be special installations such as Temporary Museum of Milano, which has never exhibited before in the Middle East. In addition, there will public talks with lead designers, such as Pauline Deltour and Giulio Cappellini. Visitors can expect to see design never seen before in the region, increase their knowledge through the fair's extensive programme and meet with leading design brands and top designers.
